

Finally, low cost packaging proofs!

The Epson Stylus Pro allows you to produce colour accurate proofs cost-effectively on clear and opaque films. And at around 16 minutes for an A2, it's no slouch either!

The water-based white ink which is a world first, makes up one of nine channels - and also makes it an environmentally friendly solution. Equipped with a MicroPiezo TFP print head, it can simulate various colour tints commonly found in white ink.

The Pro WT7900 is low maintenance and user-friendly machine, which DES can offer with a choice of RIPs — CGS ORIS Color Tuner WEB and EFI Colorproof XF.

Contact DES for more information, to receive some samples or to see the Pro WT7900 in action.
